

FINANCE **CHEETAH**

Whitepaper

**““ They can’t stop what
they can’t catch. ””**

Welcome to Cheetah

Our Aim

The fastest cat family yield auto-staking protocol on the Binance Smart Chain (BSC).

Our mission is to be the first cat revolutionary finance protocol in the DeFi space surrounded by an ecosystem of NFT's and a community to grow this project worldwide. Cheetah Finance will aim to live up to its name by being the fastest project to hit milestones and records that separates us from other projects.

Cheetah finance will award investors with Cheetah tokens by staking and compounding features, and the highest APY in the market with a staggering 1,000,000,000%.

Our Team

Behind the Cheetah Finance are a diverse group of highly skilled developers, viral marketers, creative graphic designers and professional social media managers, having profound experience in defi. We have been analyzing all the successful products in the DeFi space and are excited to bring something different from our past projects. Though our goals are high, we are aware of potential downfalls and our team has exhaustively studied what causes projects in the DeFi space to implode, to combat this, we have subsequently implemented redundancies and safety measures in both the contracts and the tokenomics to prevent attack vectors, single-source oracle exploits, possible minting & rug codes and other issues that could potentially stop a project in its tracks.

Our competent team has the knowledge, drive, and aptitude, capable of scaling Cheetah Finance to the moon, and beyond.

Auto-Staking

Cheetah finance will consist of an AutoStake feature.

It is a simple yet cutting-edge function called Buy-Hold-Earn, that provides the ultimate ease of use for \$CHEETAH holders.

Buy-Hold-Earn - By simply buying \$CHEETAH and holding the token in your wallet, you earn 4.05% daily rebase rewards directly into your wallet.

Technical Aspects

Auto-staking:

`rebase()` exists to initiate the token distribution to all users, excluding liquidity provider and contract address.

`sync()` exists to set the reserves of the contract to the current balances, providing a somewhat graceful recovery from this situation.

`sync()` functions as a recovery mechanism, in the case that a token asynchronously deflates the balance of a pair. In this case, trades will receive sub-optimal rates, and if no liquidity provider is willing to rectify the situation, the pair is stuck. This issue becomes obsolete because of `sync()`.

Auto-staking will be triggered automatically with a pre-defined, but changeable interval.

Sustainability:

The main concern when it comes to sustaining a token that provides an APY of 1,000,000,000% to all its holders is inflation of supply.

To combat that, we've taken the measure to lock 70-80% of supply via UniCrypt, which we won't be able to withdraw 100% of at any point. Then as that treasury grows from the APY, we can take that reward and burn it, which will compensate for the growing supply, as only 20% of the actual supply would be rewarded from auto-staking, while the rest will be sent straight to the burn wallet, and will not be shown as circulating supply.

NFTs

Our vision is to offer a deeply immersive metaverse in which players will create virtual worlds and games collaboratively and without central authority. We are aiming to disrupt the existing game makers like Minecraft and Roblox by providing creators true ownership of their creations as non-fungible tokens (NFTs) and rewarding their participation with our utility token – CHEETAH.

Grow your bag up to twice as fast as anyone else with a Cheetah Finance NFT. As a holder of a Cheetah Finance NFT, you get the benefit of increasing your APY to anywhere from 1,500,000,000% to 2,000,000,000% depending on rarity. Simply get a Cheetah Finance NFT, and from that day onwards, given that it is in the same wallet as your \$CHEETAH tokens, you will receive a massive bonus in your APY.

The initial Cheetah NFT genesis set will consist of a collection of 1000 uniquely and randomly auto-generated Cheetahs who consist of different species, including Tanzanian cheetah Sudan cheetah South African cheetah Northwest African cheetah Asiatic cheetah. Each specie has different rarity level, print, sex and cosmetic. Each Cheetah will eventually down the line passively yield Cheetah Finance. The rarer specie your Cheetah is, the more reward it will yield. This is a NFT utility breakthrough combining the benefits of both Non-fungible Token and Fungible Token to reward Cheetah NFT holders.

Tokenomics

Token: BEP20

Ticker: \$CHEETAH

Total supply: 100,000,000

Standard transaction fees
(buy and sell)

4% - Angels

8% - Marketing

3% - Liquidity

Huntpath

Roadmap details.

Launch Phase:

NFT genesis set preview and presale.
Website release.
Launch XXXX MC.
CMC CG application.
Standard KYC and audit.
Launch callers.

Preying Phase:

NFT minting.
Swap development.
CMC CG listed.
Aggressive marketing.
NFT launchpad for future sets.
P2E game teaser.
Giveaways.

Attack Phase:

Swap release.
Certik audit.
NFT next generations released.
NFT staking.
P2E game release.
Larger give aways.
CEX listings.
Metaverse.

Closing Statement

The team at Cheetah Finance know the importance continual development plays in the growth of a project, it is as important as the community itself and the community engagement.

The team will utilize various marketing techniques to spread the name of Cheetah Finance and make it the fastest project to hit milestones not only in the crypto world but also outside the crypto space. Cheetah will have NFT development launching at the start of the project with longer term utilities will be implemented within the Dapp with holders gaining premium access to the numerous features. More can be seen on the roadmap within our website with potential for future multi chain bridges as the project develops and grows. Cheetah Finance has a wide range of marketing skills, and will utilize these prelaunch and post launch. Various listings have already been secured after launch, with additional exchange listings in the works.
